

Poornima Bhatia ****Hard of Hearing****

AI/ML | Javascript Developer | Accessibility Advocate

- +918005534930 (WhatsApp) - poornima.bhatia@iitgn.ac - [Github](#) - [Linkedin](#)

OBJECTIVE

Hardworking and challenge-driven M.Tech (CSE - AI/ML) student with a strong foundation in real-world problem-solving through research and hands-on development. Passionate about accessibility, currently pursuing a thesis on speech recognition and automatic alt text. Known for embracing rigorous coursework and pushing boundaries in NLP, computer vision, deep learning, HCI, and ML. A fast learner with 2+ years of experience as a JavaScript developer, driven to build AI-powered solutions that promote digital accessibility and inclusion.

EDUCATION

Master of Technology in Computer Science(AI/ML) Indian Institute of Technology, Gandhinagar (Gujarat)	Graduated: August 2025
Bachelor of Technology in Computer Science Rajasthan Technical University, Kota (Rajasthan)	Graduated: May 2018

SKILLS

Web	Data Science Libraries	General	Languages
- HTML5 - CSS3 (Frameworks - Bootstrap , Tailwind, Bulma) - Javascript (Framework - ReactJS) - Salesforce LWC - WordPress - Database (Frameworks - Firebase), jQuery, SQL	- Numpy - Pandas - PyTorch - Matplotlib - JAX - Scikit-Learn - python	- Machine Learning - Deep Learning - Natural Language Processing - Computer Vision - Artificial Intelligence	- Python - C

WORK EXPERIENCE

IT Software Engineer/ Behind Earth Pvt. Ltd, Chennai (Tamil Nadu)	Feb'22 – Apr'22
- Developed and maintained web applications, focusing on performance optimization and user satisfaction. - Conducted testing and debugging to ensure high-quality code and seamless integration of new functionalities.	
Web Developer/DVG Soft Pvt. Ltd, Jaipur (Rajasthan)	Feb'21 – Feb'22
- Designed and developed multiple websites, focusing on user needs and accessibility. - Created dashboards for admin and user management to streamline operations and improve user experience. - Resolved technical challenges across projects, showcasing strong problem-solving skills.	

- Developed a food ordering and delivery web application using ReactJS and Firebase, enhancing user experience and operational efficiency.
- Designed a website for a local firm to transition operations online, focusing on front-end development and user-friendly interfaces.

Project

Speech Recognition / Accessibility - [Thesis Project Link](#)

Aug'23 - ongoing

- Desktop application for speech-to-text and text-to-speech using Google Cloud Platform.
- Implemented a classroom server-client architecture featuring student and classroom GUIs.
- Enhanced accessibility through efficient voice interaction and seamless communication between client and server components.

Automatic Alt-text / Accessibility - Thesis Project

Aug'23 - ongoing

- Integrated automatic alt-text generation for images, utilizing government resources in India to improve accessibility for visually impaired users.
- Utilized the CLIP model (Contrastive Language-Image Pre-training) to generate descriptive captions from visual-text embeddings.

Handwritten Digit Recognition / [Project Link](#)

Jan'25

- Implemented a digit classification system using the MNIST dataset to compare traditional and deep learning models.
- Built and trained both a Multi-Layer Perceptron (MLP) and a Convolutional Neural Network (CNN) from scratch in PyTorch.
- Compared model performance using accuracy and confusion matrix.
- Understood the difference in how MLP and CNN learn features from image data.

Friend Ships Lightning Website Page / [Project Link](#)

May'24

- Designed and developed a website using Salesforce Lightning Web Components (LWC), featuring pages for location, reviews, gallery, details, and editing.
- Utilized JavaScript, Apex, HTML5, CSS3, and JSON to create a functional and interactive user experience.

Snake and Ladder Game / BTech Thesis Project

- Collaborated in a team of 4 to develop a multiplayer Snake and Ladder game with network programming features for real-time gameplay.
- Used Java and the NetBeans IDE to implement the project, focusing on responsive design and user interaction.

Achievements

- **MAAC (Maya Academy of Advanced Cinematics) Certification:** Photoshop and Illustration; CoralDraw and InDesign
- **Certificates of Appreciation:** Received from RTU, Kota; During Industrial Visit to Vakrangee Limited, Mumbai
- **Salesforce Trailhead:** 50+ badges and 2 superbadges through **Salesforce Trailhead Challenges**

Teaching Assistant

- Data-Centric Computing - (Lead TA)
- Computing Lab
- Software Engineering & Testing
- Aarohan Foundational
